

Correction to “Influence of Auxiliary Ligands on the Photophysical Characteristics of a Series of Ruthenium(II)–Polypyridyl Complexes”

Luke O'Neill,* Laura Perdisatt, and Christine O'Connor

J. Phys. Chem. A **2012**, *116* (44), 10728–10735. DOI: 10.1021/jp306927a

Due to a slight systematic error the values contained in Table 1 have been amended. The luminescence peak positions for the

Table 1. Electronic Data for Ruthenium Complexes Aerated in Acetonitrile at Room Temperature

	UV/vis $\lambda_{\text{max}}/\text{nm}$			luminescence $\lambda_{\text{max}}/\text{nm}$		
	Bpy	Phen	Biq	Bpy	Phen	Biq
FPIP	460	456	550	614	605	750
NPIP	466	463	553	628	607	755
CPIP	460	458	551	622	606	752

Bpy and Phen complexes have been corrected for this oversight and can be found in Table 1. The correct values contain a small offset for the original published values and in no way effects the content, conclusions or any other finding in the paper. The peak values shown in the table should also be taken to replace peak values quoted in the discussion of Figure 3.
