

Correction to “Spectroscopy and Photophysics of Bifunctional Proton Donor–Acceptor Indole Derivatives”

Volha Vetokhina, Michał Kijak, Teodozja M. Lipinska, Randolph P. Thummel, Jerzy Sepiol, Jacek Waluk, and Jerzy Herbich*

J. Phys. Chem. A **2013**, *117* (23), 4898–4906. DOI: 10.1021/jp402767x

Because of a production error, this article was published with errors in the content. Corrections are noted here.

The Table of Contents and Abstract graphics did not have the units for the bond lengths. The corrected image is

In the Experimental Section (second paragraph, 18th line), “2-(2′-thiazolyl)indole” should be “2-(thiazol-2′-yl)-1*H*-indole”.

In the Figure 4 caption, the first line should read, “SVLF and calculated (bottom) emission...”.

On page 4904 (second paragraph, eighth and ninth lines) should be “..., whereas 20 correspond to out-of-plane (*a*′) vibrations. THAIN has 60 normal modes, 41 of *a*′ and 19 of *a*″ symmetry”.
