**Subhash C. Singh and Ram Gopal\*:** Correction to “Laser Irradiance and Wavelength-Dependent Compositional Evolution of Inorganic ZnO and ZnOOH/Organic SDS Nanocomposite Material”

Page 2812. This work also deals with investigation of the effects of the laser wavelength and irradiance on the size, shape, distribution, and compositional evolution of synthesized nanocomposites, which is an extension of our recent report.<sup>50</sup>

The following statement should have been added to Figures 1, 6, and 13: [Reprinted with the permission from ref 50, Copyright@Elsevier, 2008]. Furthermore, ref 50 should have been cited in the following places: (1) at the end of the first paragraph in the Results section, that is, after “zinc are smaller than its oxide nanoparticles”; and (2) at the end of the subsection 3.1, that is, after “zinc oxyhydroxide nanoparticles”.

In the caption for Figure 13, “Sspectra” should be “spectra”.

In subsection 4.1, before the equations “as well as our previous<sup>50</sup>” should be inserted between “present” and “work”.

Fianlly, ref 50 should be added to the References and Notes section, (50) Singh, S. C.; Gopal, R. *Physica E* **2008**, 40, 724.
