

Additions and Corrections

Volume 8, 2006

Shuzhi Dong, Gregory D. Parker, Takahiro Tei, and
Leo A. Paquette*In Pursuit of Pestalotiopsin A via Zirconocene-Mediated Ring
Contraction.

Page 2430. The configurations at C-3 in **4** and its counterpart **5** were inadvertently reversed. As delineated previously (ref 10), the major aldol product **4** (9:1) has the anti configuration, while the minor component **5** is the syn diastereomer. The correct graphic is shown below. All subsequent transformation products should reflect this minor adjustment.
