

Alberto Plaza and Carole A. Bewley.* Largamides A–H, Unusual Cyclic Peptides from the Marine Cyanobacterium *Oscillatoria* sp.

Page 6898. In this paper, we erroneously reported largamides A–C (**1–3**) to contain senecioic acid (3-methylbut-2-enoic acid). The senecioic acid residue (Chart 1, page 6901) should be replaced by tiglic acid [(*E*)-2-methylbut-2-enoic acid], shown in red; and the assignments for tiglic acid (page 6900, Table 1) should appear as shown below. The biological data reported in the paper are unaffected by this error. We gratefully acknowledge Drs. Hendrik Luesch and Susan Matthew for bringing this error to our attention.

Tiglic acid		
	δ_C	δ_H (<i>J</i> in Hz)
1	171.5	
2	131.9	
3	132.1	6.40, dq (6.7, 1.3)
4	13.8	1.77, d (6.7)
5	12.8	1.84, br s
