**Zhong Hui Li, Man Shing Wong,\* Ye Tao,\* and Hiroshi Fukutani**

Ambipolar Diphenylamino End-Capped Oligofluorenylthiophenes as Excellent Electron-Transporting Emitters.

Page 3659. In view of the signal overlap of OF(2)QTP-NPh and the residue  $\text{CHCl}_3$ , a new  $^1\text{H}$  NMR spectrum of OF(2)QTP-NPh using  $\text{CD}_2\text{Cl}_2$  as the solvent is now provided, despite the low solubility, to replace the one measured in  $\text{CDCl}_3$  in the Supporting Information.
