

## Correction to “Spiropyran to Merocyanine Conversion: Explicit versus Implicit Solvent Modeling”

Andrzej Eilmes

*J. Phys. Chem. A* **2013**, *117* (12), 2629–2635. DOI: 10.1021/jp3117209

In the original version of the paper wrong units were used in section 3.1 in the citation of the experimental data from ref 7. The next to last sentence of section 3.1 should read:

This result is consistent with experimentally estimated  $\Delta_r H$  values for SP  $\rightarrow$  MC isomerization in the D<sub>2</sub>O/MeOH mixture amounting to  $-3.0$  and  $-1.2$  kcal/mol for **1** and **2**, respectively.<sup>7</sup>
