**Filip Bihelovic, Radomir Matovic, Bojan Vulovic, and
Radomir N. Saicic***

Organocatalyzed Cyclizations of π -Allylpalladium Complexes: A New Method for the Construction of Five- and Six-Membered Rings.

Page 5064. Two references pertinent to the described work have been omitted in ref 13: For the first example of combining organocatalysis and transition metal catalysis, see: (e) Jellerichs, B. G.; Kong, J.-R.; Krische, M. J. *J. Am. Chem. Soc.* **2003**, *125*, 7758. For a recent application of double catalysis to a highly efficient asymmetric allylation of aldehydes, see: (f) Mukherjee, S.; List, B. *J. Am. Chem. Soc.* **2007**, *129*, 11336.
