Construction of Chiral Quaternary Carbon Centers by Pd-Catalyzed Asymmetric Allylic Substitution with *P,N*-1,1'-Ferrocene Ligands.

Page 4399, right column, line 7. The sentence should read "However, there have been a few reports on the construction of an all-carbon-substituted chiral quaternary carbon center on an allyl substrate using Pd-catalyzed allylic alkylation", and the following papers should be added as references: Trost, B M.; Jiang, C. *J. Am. Chem. Soc.* **2001**, *123*, 12907. Trost, B M.; Jiang, C. *Org. Lett.* **2003**, *5*, 1563.
