

Correction to “Phase Behavior of Carbon Dioxide Confined in Silica Aerogel in the Vicinity of the Bulk Critical Point”

Salvino Ciccariello, Yuri B. Melnichenko,* and Lili He

J. Phys. Chem. C **2011**, *115* (45), 22336–22346. DOI: 10.1021/jp205189g

We realized that eqs 9, 18, 19, 24, and 25 of the above quoted paper were misprinted. The correct equations read as follows

$$\hat{\mathcal{A}} \equiv (1 - \hat{n}_2)^2 \alpha(\nu) = \frac{\mathcal{A}}{2\pi n_1^2 \mathcal{S}} \quad (9)$$

$$Q_{\text{Prd}} = \mathcal{E} + \mathcal{F} \quad (18)$$

$$Q_{\text{Prd}} = \mathcal{E} - \mathcal{F} \quad (19)$$

$$\chi_{\text{fnl},+} = \frac{1}{29} \times \sum_{j=1,29} [Q_{\text{Prd},j} - [\mathcal{E}(\mathcal{S}, \Phi_1; \mathcal{A}_j, \mathcal{R}_j) + \mathcal{F}(\mathcal{S}, \Phi_1; \mathcal{A}_j, \mathcal{R}_j)]]^2 \quad (24)$$

and

$$\chi_{\text{fnl},-} = \frac{1}{29} \times \sum_{j=1,29} [Q_{\text{Prd},j} - [\mathcal{E}(\mathcal{S}, \Phi_1; \mathcal{A}_j, \mathcal{R}_j) - \mathcal{F}(\mathcal{S}, \Phi_1; \mathcal{A}_j, \mathcal{R}_j)]]^2 \quad (25)$$

We explicitly add that the numerical results reported in the paper are not affected by the misprints.
