Bin Cao, Dong Xiao, and Madeleine M. Joullié*

Synthesis of Bicyclic Cyclopropylamines by Intramolecular Cyclopropanation of *N*-Allylamino Acid Dimethylamides.

Page 1799. We inadvertently omitted references to the work of Professor Sato and his group. These are as follows.

(1) Kasatkin, A.; Sato, F. *Tetrahedron Lett.* **1995**, 36, 6079–6082.

(2) Kasatkin, A.; Kobayashi, K.; Okamoto, S.; Sato, F. *Tetrahedron Lett.* **1996**, 37, 1849–1852.

(3) Okamoto, S.; Iwakubo, M.; Kobayashi, K.; Sato, F. *J. Am. Chem. Soc.* **1997**, 119, 6984–6990.

The first reference (1) refers to the first intramolecular cyclopropanation of ω -vinyl esters. The second reference (2) describes the same results as those reported in ref 8 of our paper, and the last reference (3) reports that titanium-mediated cyclization provides an efficient and practical method for synthesizing N-heterocycles from amino acids.
