Anna M. Track, Ferdinand Rissner, Georg Heimel, Lorenz Romaner, Daniel Käfer, Asif Bashir, Gerold M. Rangger, Oliver T. Hofmann, Tomáš Bučko, Gregor Witte, and Egbert Zojer*: Simultaneously Understanding the Geometric and Electronic Structure of Anthraceneselenolate on Au(111): A Combined Theoretical and Experimental Study

Page 2677. The description of the UPS methodology on p 2679 should be extended: For UPS measurements the sample was held at -9 V bias to increase the photoelectron kinetic energy and enhance the low energy secondary cutoff.

The acknowledgment should be extended: We thank Jan Müller and Andreas Terfort (Hamburg/Frankfurt) for providing the anthracene selenoacetate used in this study. D.K. acknowledges financial support from the Studienstiftung des Deutschen Volkes.
