

Additions and Corrections

Vol. 2, 2000

David R. Williams* and Regis A. Turske

Construction of 4-Hydroxy-2-pyridinones. Total Synthesis of (+)-Sambutoxin.

Page 3219. Scheme 3 illustrates the conversion of iodide **12** into the methyl ester **13**. Step 1 should diagram the reaction of 3-butenyl Grignard reagent, not allyl Grignard as shown, for the addition of the four-carbon unit. Experimental procedures and spectra data are available in the Supporting Information of the original paper (ol006410+).
