

Vol. 2, 2000

**Lee J. Silverberg,\* Sean Kelly, Purushotham Vemishetti, David H. Vipond, Frank S. Gibson, Brian Harrison, Richard Spector and John L. Dillon\***

A Crystallization-Induced Stereoselective Glycosidation Reaction in the Synthesis of the Anticancer Drug Etoposide.

Page 3281, column 2: The first sentence should read “Conditions for protecting group removal must be mild in order to proceed in high yield and to avoid base-catalyzed isomerization to the cis-fused lactone or acid-catalyzed cleavage of the ethylidene linkage.”
