José Luis García Ruano,* Alberto Fraile, M. Rosario Martín,* and Alberto Nuñez. First Asymmetric Cycloaddition of Carbonyl Ylides to Vinyl Sulfoxides and Furan-2(5*H*)-ones.

Pages 6536–6541. The term “cycloaddition of carbonyl ylides to vinyl sulfoxides”, as it was used in the title of our paper and in some parts of the Introduction, was only meant to refer to [3 + 2]-cycloaddition reactions. An example of a [5 + 2] intramolecular cycloaddition of β -silyloxy- γ -pyrones to vinyl sulfoxides had previously been reported by Mascareñas et al. (*Org. Lett.* **2000**, 2, 1005). We thank Professor David Hodgson for pointing this out to us.
