

**Correction to “Nanoparticles of Fullerene C<sub>60</sub> from Engineering of Antiquity”** [*The Journal of Physical Chemistry C* **2010**, 114849–856 DOI: 10.1021/jp909331n]. Shigeru Deguchi,\* Sada-atsu Mukai, Tomoko Yamazaki, Mikiko Tsdume, and Koki Horikoshi

The description in the Sample Preparation section should be corrected; “5 mL of an aqueous solution of SDS (40 mM) was added” should read as “5 mL of water or an aqueous solution of SDS (40 mM) was added”.

We noticed typos in eqs 3 and 4 after online publication. Correct equations are

$$n_{\text{total}} = \frac{4\pi}{3} \left( \frac{d}{2} \right)^3 \frac{4}{l^3} \quad (3)$$

$$n_{\text{surface}} = n_{\text{total}} - \frac{4\pi}{3} \left( \frac{d}{2} - l \right)^3 \frac{4}{l^3} \quad (4)$$

The typos were the result of a production error during reformatting of the equations. The reported values for  $n_{\text{total}}$ ,  $n_{\text{surface}}$ , and  $\phi$  were calculated according to the correct equations.
