A Stereoselective Synthesis of Digitoxin and Digitoxigen Mono- and Bisdigitoxoside from Digitoxigenin via a Palladium-Catalyzed Glycosylation.

Page 4339. The structures of digitoxin (**1**), digitoxigenin (**2**) (in Figure 1), and the aglycon portion (**Dig**, in Schemes 1, 5, and 6) were drawn incorrectly. The correct structures are shown below.

**Dig** =

Page 4341. The aglycons of compounds **17–21** and **27** (Schemes 4, 5, and 6) were similarly drawn incorrectly. The correct structures are also shown below. We would like to

thank Prof. Pavel Kocovsky for bringing this matter to our attention.
