

Guillem Portella, Jordi Poater,* Josep M. Bofill, Pere Alemany, and Miquel Solà.* Local Aromaticity of $[n]$ Acenes, $[n]$ Phenacenes, and $[n]$ Helicenes ($n = 1-9$).

Pages 2509–2521. We thank an anonymous reader of our manuscript for bringing the following important reference to our attention. Bendikov et al. reported that polyacenes longer than pentacene possess open-shell singlet diradical ground states. The possibility of an open-shell singlet state was not considered in our investigation.
