Zhong Hui Li, Man Shing Wong,* Ye Tao,* and Hiroshi Fukutani

Ambipolar Diphenylamino End-Capped Oligofluorenylthiophenes as Excellent Electron-Transporting Emitters.

Page 3659. In view of the signal overlap of OF(2)QTP-NPh and the residue CHCl₃, a new ^{1}H NMR spectrum of OF(2)QTP-NPh using CD₂Cl₂ as the solvent is now provided, despite the low solubility, to replace the one measured in CDCl₃ in the Supporting Information.
