Correction to "Size Dependence of the Plasmon Ruler Equation for Two-Dimensional Metal Nanosphere Arrays"

Xue Ben and Harold S. Park*

We acknowledge a typo on page 15919 of the work by Ben and Park,[1] eq 10. Specifically, there is a factor of $i^{2/3}$ in the denominator of the equation which should in fact be $(2/3)i$. The correct equation should be written

$$\alpha_{\text{sphere}} = \frac{\varepsilon - \varepsilon_m}{(\varepsilon + 2\varepsilon_m) - (\varepsilon - \varepsilon_m)q^2 - (2/3)i(\varepsilon - \varepsilon_m)q^3} a^3$$

(1)

The error was made only in the manuscript and not in the calculations, so all conclusions made in the original work remain valid.
